

VISVESVARAYA TECHNOLOGICAL UNIVERSITY BELAGAVI

DBMS MINI PROJECT ON “TOURISM MANAGEMENT SYSTEM”

Submitted in partial fulfilment for the requirements for the fifth semester

BACHELOR OF ENGINEERING IN INFORMATION SCIENCE AND ENGINEERING

For the academic year 2022-2023

Submitted by:-

Manasa C M USN:1MV20IS029
Shreyaa B S USN:1MV20IS056

Under the guidance of

Mr Vijava Kumara Y M
Assistant Professor, Department of ISE, Sir MVIT

Department of Information Science and Engineering
Sir M Visvesvaraya Institute of Technology, Bengaluru

SIR M. VISVESVARAYA INSTITUTE OF TECHNOLOGY

Krishnadevaraya Nagar, International Airport Road, Hunasmaranahalli, Bengaluru –

DEPARTMENT OF INFORMATION SCIENCE AND ENGINEERING

CERTIFICATE

It is certified that the DBMS Mini Project work entitled "TOURISM MANAGEMENT SYSTEM" is carried out by Manasa C M (1MV20IS029) and Shreyaa B S (1MV20IS056), bonafide students of Sir M Visvesvaraya Institute of Technology in partial fulfilment for the 5th semester for the award of the Degree of Bachelor of Engineering in Information Science and Engineering of the Visvesvaraya Technological University, Belagavi during the academic year 2022-2023. It is certified that all corrections and suggestions indicated for Internal Assessment have been incorporated in the report deposited in the department library. The project report has been approved as it satisfies the academic requirements in respect of project work prescribed for the course of Bachelor of Engineering.

ACKNOWLEDGMENT

It gives us immense pleasure to express our sincere gratitude to the management of Sir M. Visvesvaraya Institute of Technology, Bengaluru for providing the opportunity and the resources to accomplish our project work in their premises. On the path of learning, the presence of an experienced guide is indispensable and we would like to thank our guide Dr Vijaya Kumara Y M, Assistant Professor, Dept. of ISE, for her invaluable help and guidance. Heartfelt and sincere thanks to Dr. P. Vijay Karthik, HOD, Dept. of ISE, for his suggestions, constant support and encouragement. We would also like to convey our regards to Dr. S G Rakesh, Principal, Sir. MVIT for providing us with the infrastructure and facilities needed to develop our project. We would also like to thank the staff of Department of Computer Science and Engineering and lab-in-charges for their co-operation and suggestions. Finally, we would like to thank all our friends for their help and suggestions without which completing this project would not have been possible.

ABSTRACT

As we know Database Management is used in the various fields, we have developed a database management project to know and to understand it in the better way. Here we have attempted to design a project which we have named as “TOURISM MANAGEMENT SYSTEM” incorporating as many features as possible and adding a few our own, using the data structure and skills that we have learnt in class. It is our first insight into the vast world of database management.

This project is on “TOURISM MANAGEMENT SYSTEM” which basically deals with storing and managing the user by using an id and password, in this, user can directly see his/her tourism to be hired by providing his/her user id and password.

We have one more option here in which a user can view the details of the tourist places and also has access to view the tourist package throughout the year.

INTRODUCTION

Tour Management system is a dynamic website for tourism business. It is dynamic and responsive web design. It is also called travel technology solution for agencies & tour operation. Nearly everyone goes on a vacation for this 'a Tourism management system' would play a vital role in planning the perfect trip. The tourism management system allows the user of the system access all the details such as location, events, etc. The main purpose is to help tourism companies to manage customer and hotels etc. The system can also be used for both professional and business trips. The proposed system maintains centralized repository to make necessary travel arrangements and to retrieve information easily. Tourists are more attractive for cultural diversity of the world. Bangladesh is one of the most beautiful countries in the south Asia. Rangamati, Cox's Bazar, Saint-Martin, Sundarbans, Sylhet, Moulvibazar are the famous tourist place in Bangladesh as well as in Malaysia, Singapore, Bangkok, Maldives, Nepal, India have attractive tourist places.

LITERATURE SURVEY

XAMPP is one of the widely used cross-platform web servers, which helps developers to create and test their programs on a local web server. It was developed by the Apache Friends, and its native source code can be revised or modified by the audience. It consists of Apache HTTP Server, MariaDB, and interpreter for the different programming languages like PHP and Perl. It is available in 11 languages and supported by different platforms such as the IA-32 package of Windows & x64 package of macOS and Linux. XAMPP is an abbreviation where X stands for Cross- Platform, A stands for Apache, M stands for MYSQL, and the Ps stand for PHP and Perl, respectively. It is an open-source package of web solutions that includes Apache distribution for many servers and command-line executables along with modules such as Apache server, MariaDB, PHP, and Perl. XAMPP helps a local host or server to test its website and clients via computers and laptops before releasing it to the main server. It is a platform that furnishes a suitable environment to test and verify the working of projects based on Apache, Perl, MySQL database, and PHP through the system of the host itself. Among these technologies, Perl is a programming language used for web development, PHP is a backend scripting language, and MariaDB is the most vividly used database developed by MySQL. The detailed description of these components is given below. PhpMyAdmin is a free software tool written in PHP, intended to handle the administration of MySQL over the Web. PhpMyAdmin supports a wide range of operations on MySQL and MariaDB. Frequently used operations (managing databases, tables, columns, relations, indexes, users, permissions, etc) can be performed via the user interface, while you still have the ability to.

XAMPP phpMyAdmin ...What is it? PhpMyAdmin is a free and open source software that lets you handle the administration of MySQL over the web. You can easily manage the database through a graphic user interface known as phpMyAdmin in this case. phpMyAdmin is written in PHP and

has gained a lot of popularity in terms of web-based MySQL management solution. You can perform operations on MySQL via phpMyAdmin user interface while you can still directly execute SQL queries. And it lets you carry out operations like editing, creating, dropping, amend MySQL database, alter fields, tables, indexes, etc. In fact, which user should be given what privileges, you can manage LITERATURE SURVEY

SCOPE

Tourism Management System is integrated software developed for tour operating companies. The main aim of this project is to help the tourism companies to manage their customers, vehicles, and agent. It makes all operation of the tour company easy and accurate. The standalone platform makes tourism management easy by handing agencies requests and providing servers for the customers located at different parts of the various cities. Different modules have been incorporated in this project to handle different parts and sector of the tour management field.

OBJECTIVES

The Tourism Management System is a web based application and maintains a centralized repository of all related information. The Objective of this project is to develop a system that automates the process and activities a travel agency and customer details. The purpose is to design a system using which one can perform all operations related to travelling and sight-seeing.

PROJECT OUTCOMES

There are some objectives or outcomes have each project. So, my Project has some outcomes or objectives. These objectives are given below briefly.

- This system will provide to connect directly customers and agent through internet.
- This System provides facilities to modify and delete tourist's data as well as client data.
- This System provides Feedback mechanism for tourist.
- This System provides some social media links.
- This System provides information about the Inbound and Outbound Tour Packages.
- This System maintains & controls the database of tourists' information.
- This System display attractive tourist places.
- This System give a variety of travel services that will sure to match all your priorities
- This System help to make strong relationship with customers so that they can enjoy that holiday of their dreams.

- This System also helps to develop tourism with different cultures so that they enrich the tourists experience and build pride.
- This System will provide display platform in where a tourist can find their tour places according to their choices.

Finally, I can say that This System will provide easy and efficient work for the agency.

PROBLEMS IN THE EXISTING SYSTEM

The present systems are inadequate in providing information and advices to the agencies and customers about tour plans. Often agencies are compelled to rely on local information sources and count on their own experience regarding time and cost. Through phone call they have to get information. There are some problems which are existing in my System those are given below concisely

- There will be many users visiting the portal and hence we require a strong and reliable frontend which can withhold the users on our site.
- We need a strong Database whereas data will be store of everyone.

REQUIREMENT ANALYSIS

REQUIREMENT ANALYSIS

The Tour and Travel Management System is a web based application. The main purpose of “Tours and Travels Management System” is to provide a convenient and easy way for a customer to book hotels, flight, train and bus for tour purposes. To run this System, Software and Hardware Requirements are necessary. Requirements which are needed are given below briefly.

HARDWARE REQUIREMENTS

- Processor – At least 2.0 GHZ
- RAM – At least 2GB

SOFTWARE REQUIREMENTS

- Operating System – Windows.
- Runtime Environment – Net Framework 4.5
- Frond End – PHP, HTML, CSS, JavaScript, Ajax.
- Back End – MySQL
- Editor Tools – Atom, Notepad ++
- Other Graphics Tools – Adobe Photoshop.
- Web Browser – Google Chrome, Firefox, or any compatible update browser.

PROJECT DEVELOP LANGUAGES

There are two kinds of languages have used in “Tour Management System”. One is Programming Language and other is Database Language. Front End, I have used PHP, JavaScript, HTML, CSS & Back End, I have used MySQL Database Language in my “Tour Management System”

- **Programming Language & Markup Language:** PHP, JavaScript, HTML
- **Color Script Language:** CSS
- **Database Language:** MySQL

➤ **JavaScript:**

This language helps to make dynamic Website. I have used JavaScript at home page for “Slideshow & Time”.

➤ **PHP**

This language helps to develop logical function in Website. I have used PHP in different section for creating function such as “Database Connection”, “Admin/User Login Validation”, “Data Insert, Update, Retrieve and Delete”.

➤ **HTML**

This is markup script Language for creating web page. I have used it different section in my “Tour Management System” Such as for making “Header & Footer” in home page. Inbound and Outbound Title’s information.

➤ **CSS**

Cascading Style Sheet is a Style sheet language that mostly used to design website I have used this style sheet language in different section at my project. Such as “Admin Panel” Design, Home Page “Top Navigation Drop Down Bar” design.

ADMIN LOGIN PAGE

The Admin Login Page features a blue background. At the top center, the text "Sign In" is displayed in white. Below this, there are two input fields: "Username:" and "Password:", each with a red label and a white input box. To the right of the "Password:" field is a dark blue "Sign In" button. At the bottom center, there is a red link that says "Back to home".

ADMIN DASHBOARD

The Admin Dashboard is titled "TOURISM MANAGEMENT SYSTEM" in a green header bar. On the right side of the header, there is a user profile section with a circular icon, the text "Welcome Administrator", and a dropdown arrow. Below the header, there is a breadcrumb trail "Home >". The main content area displays five statistics in colored boxes: "User" (8) in red, "Bookings" (10) in blue, "Enquiries" (4) in green, "Toatal packages" (6) in purple, and "Issues Riased" (5) in green. A sidebar on the left contains a menu with the following items: Dashboard, Tour Packages, Manage Users, Manage Booking, Manage Issues, Manage Enquiries, and Manage Pages.

CONCLUSION AND FUTURE ENHANCEMENTS

CONCLUSION

This mini project on “Tourism Management System“ using the back-end and front-end is a database that provides the user to save the details about themselves, tourism hiring, booking details , services, etc,. It provides Admin and user login with many more functions like adding new users, updating the booking details, tourism hiring process, component details to the database. The user can see the details in this system. Mainly, this database was created to store the details to update as per need.

SCOPE FOR FUTURE DEVELOPMENT

The project has a very vast scope in future. The project can be implemented on internet in future. Project can be updated in near future as and when requirement for the same arises, as it is very flexible in terms of expansion.
